

AN APPEAL TO ESTABLISH THE INTERNATIONAL UNION "SOVINTERN" — FOR SOCIALISM IN THE 21ST CENTURY

We, the undersigned, invite all interested political parties, movements, organizations, and other public and political forces from all continents, who should initially accept this proposal as a basis for further discussion and common actions, to join us in dialogue and next steps toward establishing the International Union "SOVINTERN" — For Socialism in the 21st Century!

The urgent need for the development of a modern, strong, massive, vigorous and victorious historical trend of the socialist movement, worldwide and in every nation, as well as coordinating efforts worldwide and taking advantage of the shared experience, while maintaining their political, ideological and organizational independence, is becoming crucial for Humanity, in an era when:

- the aggressive Western elites are causing imperialist Wars and interventions, promote neocolonialism and a modern variety of fascism, carrying out acts of genocide, even risking the destruction of the entire planet and of the environment,
- at the same time the Western model is sinking into decline, recession, impasse and the danger of a new sweeping economic crisis while the plan of the collective West for «global domination" in a uni-polar world is failing, with the Global South rising and moving into a more fair multi-polar world,
- the position of the workers is deteriorating and their achievements (economic, social, democratic and concerning human rights) are shrinking while the level of inequality and over-concentration of wealth in the hands of an ever smaller number of individuals, has reached its highest point in history,
- the future of the new generation is becoming bleak, which means it will live worse than the previous ones.

SOVINTERN represents a worldwide socialist initiative uniting healthy social and political forces across the globe for universal freedom and justice, drawing experience from successes and failures, as well as the theoretical background and the more recent developments of the socialist movement over the last 150 years.

SOVINTERN is inspired by the values of Soviet civilization. It aims to shape a new political reality in the world, based on the principles formulated and implemented by the Soviet civilization, as well as on the lessons learned from experience of historic failures, distortions, and even betrayals that occurred over the decades.

The USSR was the first state where socialism triumphed in all aspects. The worldwide socialist system made possible the space exploration and the use of nuclear energy for peaceful purposes, universal free education and healthcare, and opportunities for self-realization for all people regardless of income, nationality, religion or skin color.

Thanks to the peaceful principles of Soviet foreign policy and the deterrent power of the USSR, the planet was saved from global military conflict for many decades in the 20th century during the difficult times of a bipolar world and the Cold War. These principles were then embraced by the overwhelming majority of people, leaders, and nations who managed to resist the aggressive war mongers from Western countries. These same principles can be applied today if joint efforts are made: PEACE — FRIENDSHIP — INTERNATIONALISM — SOLIDARITY — COOPERATION — JOINT PEACEFUL DEVELOPMENT.

We aim to unite politicians, public figures, civic activists, as well as representatives of science, culture, sports, and media worldwide who are ready to collaborate in reviving the achievements of Soviet civilization and building a new just world.

We aim to utilize the development and operation of a modern interactive safe online platform for this purpose, which will function as a permanent congress of socialist movements and organizations worldwide in all languages.

The boundless possibilities of new technologies ensuring promptness and speed of information exchange and content delivery, as well as the exchange of opinions and experience, will be the key to SOVINTERN's political efficiency. The core idea of the project is to create a secure environment where socialists from around the world can interact with each other. A continuous interactive conference or a congress, a kind of worldwide movement of "digital Bolsheviks," meeting the needs and conditions of the 21st century, might thus be established.

PEACE INSTEAD OF WAR!

DISARMAMENT INSTEAD OF AN ARMS RACE!

PEACEFUL DEVELOPMENT OF THE PLANET SHOULD ENSURE THE SURVIVAL OF HUMANITY!

SOLIDARITY INSTEAD OF FRAGMENTATION.

COOPERATION INSTEAD OF EXPLOITATION.

If you share our views and respect Soviet ideological principles, join us at org@sovintern.org. Soon, we will invite you to our new worldwide social network.
